

We are requesting your support for 7 years old **SHIVA YADAV**, who is battling for life against a life threatening disease **Acute Myeloid Leukemia (AML)**. It is a cancer of the myeloid line of blood cells, characterized by the rapid growth of abnormal cells that build up in the Bone Marrow and blood and interfere with normal blood cell production. He is currently being treated at Oncology Dept., KGMU Lucknow.

His father is a labor and He belongs to BASTI (U.P). He has already spent 1 lacks for his previous treatment. Shiva was declared cancer-free in September 2025. As months passed by, they began to let go of fear gripped this family when they heard **SHIVA** scream. **SHIVA** was suffering with high fever. they rushed him straight to the hospital. The doctor said to him, **SHIVA's blood cancer has come back**. It is worse this time, spreading faster. They had no time to think and immediately started chemotherapy.

Chemotherapy is no longer enough to beat this cancer. Shiva needs a BONE MARROW TRANSPLANT now.

It is the only way he has a chance of beating cancer once. He has been getting injections in the spine as a part of his treatment. He is in severe pain, is exhausted and incredibly terrified of what is coming next.

Bone Marrow Transplant Surgery estimated cost is 4-5Lacs.

These Parents are helpless. He has already spent all savings and taken out a loan to afford the treatment last year and has no source left to approach now. This time, they are begging everyone.
